### What Makes Our Online Courses Unique

Our online courses are unique because they're set up much like the seated classroom: participants can listen to a voiced lecture and get feedback on their work. Once signed up, participants have unlimited access to each module for one week, and can download and print each module supplement, which explains the concepts discussed in the lecture in greater detail and provides additional resources.

### What's Included

The six-week technical writing course includes:

- A voiced lecture
- Supplements that provide additional resources and explanation of the concepts discussed
- Assignment(s)
- Professional written feedback on all work submitted
- A certificate of completion

### Assignment (Weekly Writing Options)

The concept behind the downloadable **Assignment** section is that by completing the assignments, you will learn to better analyze your own and others' writing, which should enable you to make better informed choices in terms of language, style, tone, and organization.

**The Assignment section** gives you three options: the opportunity to

Online Technical Writing Course Description  
Hurley Write, Inc.

- write or continue to work on a document of your choosing (a report for work, an article for publication, a thesis, for example);
- work on a case study provided in the assignment;
- work on technical articles published in your field.

**Module 1: Analyzing Audience and Purpose**

**Module 2: Developing Organizational Strategies**

**Module 3: Using Language Effectively**

**Module 4: Constructing Effective Sentences and Paragraphs**

**Module 5: Writing the Technical Report**

**Module 6: Writing and Editing Strategies**

**Cost: \$499 per person; discounts for multiple attendees**
