PAM: YOUR AI REVIEWING PARTNER

AI was supposed to cut review time. It's doing the opposite.

According to recent research, AI is **increasing, not decreasing, review time.** Documents can be produced much faster, but writers aren't reviewing their own drafts closely. The result? **Leadership, Quality, and other reviewers are left to clean up AI slop.**

29%

of regular AI users don't fully review AI-written documents before sending them.

Smallpdf survey, 2026

~2 hours

spent cleaning up each piece of AI "workslop" a colleague sends.

Stanford Social Media Lab & BetterUp Labs

-14 min

a week for end users, once time spent checking AI output is counted.

Foxit, 2026

The good news? We have the solution: PAM.

PAM is Hurley Write's secure, closed-loop AI model, built on the science of readability. Your writers run their drafts through PAM **before** anyone else has to clean them up.

How PAM reviews your documents

1

PAM redlines your documents

Every draft comes back marked up, so writers see exactly what needs to change.

2

PAM explains every change

Each edit is tied to readability concepts, so writers learn to catch issues themselves.

3

PAM rewrites the document

Writers get a clean, readable version that's targeted and on point.

- **Closed-loop, secure system**
  Your documents stay in a closed-loop, secure system.
- **No prompts needed**
  Your team can start right away.

Stop AI slop before it reaches Leadership and Quality. PAM makes every writer their own first reviewer, so the people downstream get documents that are ready to read.

Make PAM your team's first reviewer.

Ask us how to add PAM to your Hurley Write training.
