Introduction

This customized course teaches your team research-based, relevant strategies that will give them the roadmap to improve their written and verbal communication skills.

This workshop teaches your team how to apply their problem-solving skills to plan and write more effective, targeted documents and give compelling, engaging oral presentations.

They'll learn how to

Apply their problem-solving skills to develop new strategies

Apply these strategies to their writing and presentations

Write more powerful, effective documents in less time

Plan and give effective presentations

In our workshops, participants have multiple opportunities to apply strategies to real-world problems and examples and receive feedback from our award-winning, experienced instructors.

In short, they'll complete the workshop as more powerful and efficient communicators.

How It's Offered

This three-day customized course is offered onsite at your facility for up to 15 people.

You decide which of the following topics you want to offer in the writing portion of the workshop:

Exceptional Technical Writing

Better Business Writing

SOP Writing

Succinct Scientific Writing

For the presentations session, you can choose from the following topics:

Data-driven Storytelling

The Elements of Great Presentations

Presenting to the Boardroom

Creating and Delivering Effective Technical Presentations
